

# **DDAY 1944**

< IMPROVED VERSION in Higher resolution >

There is 1 solo map in this plugin, and 2 Multiplayer maps

- 1) DDAY Omaha beach: SOLO MAP
- 2) DDAY MULTIPLAYER MAP
- 3) CARENTAN (with it's variants of defend as Germans or Defend as USA)

1) DDAY SOLO is the landing of the U.S. troops at Omaha beach on June 6, 1944.

You play the Allies side coomanding US troops, and your objective is to capture the trenches and kill every German soldier that lives on the map.

You can play as well this map as MULTIPLAYER COOP against the computer AI.

2) DDAY MULTI: set up as a huge DDAY map where there's 2 teams, Germany (defends) and USA (attacks). It's better to play this with 6 people at least, as it's very large and there's 100 units per team.

3)CARENTAN : a nice full of NEWmodels map, with 2 variants: defend as Germans or Defend as USA

Credits:

CARLINHO: Colour maps, scripting, new units, new sounds, new models, fear and loathing, Dtexturing Carentan.

DDAY bunker models done by POINT and ported by Carlinho.

POINT: Textures for landing crafts in DDAY. Fear tweaks and polishing. German defense cannon unit. Testing and polishing overall.

Oskarmann: German voices

Jon God: Amazing Dtexturing for DDAY map.

All other models and collections are borrowed from Bungie.

TITANS(santa's head) was used as the skeleton of the plug (all physics borrowed from Santa's Head units).

I used the German grenade from a collection from the fabulous map WWI Verdun.

This is intended exclusively for NON-Commercial use, please DO NOT use this units for anything related to commercial use or copyright infringement.

You can modify and use units for new plugs beyond may 2011. Please don't release anything with this before then, I would love to give it a chance to being final before doing any butchering and dismember...

Enjoy!!!
